MATHIMOZHI E R

mathimozhiezhil@gmail.com | +91-8220709733 | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Pre-final year IT student (2027 batch) with production-grade Java backend experience in RESTful APIs, Object-Oriented Programming (OOP), and secure system design. Strong problem-solving and analytical skills with proven ability to work independently and in cross-functional team environments. Oracle-certified in Java SE11 and DBMS. LeetCode: 160+ problems solved (Arrays, Strings, Trees, Graphs, DP)

EDUCATION

Saveetha School of Engineering *Chennai, India*

B.Tech – Information Technology | CGPA: 8.87 *Jun 2023 – May 2027*

E.S Matriculation Higher Secondary School *Villupuram, Tamil Nadu*

HSC – Biology and Mathematics | 90.0% *Jun 2022 – Apr 2023*

TECHNICAL SKILLS

Languages	Java (Primary), Python, SQLite, DBMS
Backend	Java EE, RESTful Web Services, JDBC, MVC Architecture
DSA & OOP	Data Structures, Algorithms, Object-Oriented Programming (OOP), Problem-Solving.
Dev Tools	Git, Docker, Postman, Swagger, Eclipse, VS Code, Figma
Testing	JUnit, Unit Testing, API Testing, Debugging
Methodologies	Agile, Scrum, SDLC, Code Review, Technical Documentation
Gen AI / ML	Gemini API, Prompt Engineering, LLM/Coding Agent Integration, Task Automation via AI, Kaggle
Frontend	HTML, CSS, JavaScript (Basic)

INTERNSHIPS

Java Developer Intern | Twilight IT Solutions *Aug 2025 – Oct 2025*

- Engineered and maintained 10+ Java-based backend modules across the full SDLC — from design and development to testing and deployment — directly reducing production incident response time by 22%.
- Architected RESTful API specifications using Swagger and collaborated with cross-functional teams to maintain clear technical documentation, cutting onboarding time and ensuring clean, maintainable code standards across the team.

Web Developer Intern | Askan Technologies *Nov 2025 – Dec 2025*

- Developed and deployed responsive web applications, writing clean, efficient, and maintainable code that improved user engagement by 20% and reduced page load time by 15% — demonstrating end-to-end software development.
- Served as a bridge between frontend and backend teams by aligning API contracts, maintaining shared integration documentation, and reducing frontend-backend defects by streamlining data flow agreements.

PROJECTS

Patient Registration System – Validation & Data Integrity Engine *Jan 2026 – Feb 2026*

- Designed and developed a production-style RESTful backend in Java to handle 5,000+ patient records, implementing comprehensive input validation and error-handling pipelines that boosted data accuracy by 35%.
- Engineered a dual-ORM data layer: raw JDBC for performance-critical queries and Hibernate ORM for entity mapping and session management, reducing manual SQL overhead and improving maintainability of the persistence layer.
- Created and maintained clear technical specifications and API workflow documentation using Swagger, following best practices for clean, maintainable code to support long-term system reliability.

Privacy-Preserving Secure Data Sharing Framework *Dec 2025 – Jan 2026*

- Architected a distributed data-sharing system capable of handling 10,000+ transactions using AES-256 and RSA encryption, reducing security vulnerability surface by 40% and enforcing RBAC-based access control at the API layer.
- Designed scalable Hibernate ORM mappings with HQL query optimisation, minimising database round-trips and sustaining high-throughput performance under peak load — directly simulating real-world e-commerce traffic patterns.

CERTIFICATIONS

- Oracle Certified Java SE11 Developer – Oracle
- Oracle Certified Database Management System Professional – Oracle
- Cybersecurity IAM Job Simulation – Tata Forage
- Introduction to Artificial Intelligence – Infosys Springboard
